Notes/Comments			
<p>1. Testing and specifications as per OAR 333-008-1190.</p> <p>2. milligram (mg), gram (g)</p> <p>3. unit = package quantity provided by manufacturer, unit is not equivalent to recommended serving size</p> <p>4. LOQ = Limit of Quantitation. Compounds detected below LOQ are below the calibration range of the method and are not quantified.</p> <p>5. Potency levels are reported as is in the sample submitted. Sample represents final product of useable marijuana that is not intended to be heated prior to injection.</p>
